

# Improving Long-Term Care for DEEs: How to Optimize Diagnosis in Your Clinic

Each participant will receive complimentary access via email to this series' InSite platform, which will provide additional education on the management and treatment of DEEs.

Don't miss out on this exciting opportunity, where you will gain access to exclusive education, be connected with peers via an interactive discussion forum, and have your most pressing questions answered.

1. Attend a In-Person Grand Round or Webinar
2. Participate watching a faculty micromodule on the InSite platform and complete the post-program evaluation to receive .50 CE Credit
3. If you have a challenging DEE case, we invite you to submit and present your own case at one of our micromodule virtual programs. If selected, you will receive an honorarium of \$1000. (Participation in steps 1 and 2 is required)
